

Fearless International (FRLE) \$0.19

Fearless International Inc., a luxury performance boat manufacturer, has been the focus of the media for the last several months in magazine such as GQ, Time, Bloomberg Markets, Maxim, and over 20 others.

According to TIME, "When a company bold enough to call itself Fearless Yachts splashed onto the luxury-boat market, it drew considerable attention. Collaborating with Porsche Design Studio/Austria on a series of high-style, high-performance yachts, the brand unveiled its first model, the Fearless 28, in February." Since its release, Fearless Yachts has taken orders for more than 33 Yachts bringing more than \$10 Million in sales and put the production facility at 75% capacity.

Top 5 Reasons To Consider Fearless Yachts:

- 1: Already \$10,000,000 In Sales Since First 7 Months.
- 2: First of a 5 yacht series had huge response from the market.
- 3: Next yacht designs have been released and Debut is in Miami in February
- 4: Company set to begin international marketing.

After two years passed without any progression of Mr. Like PRK, there is more pain than with Lasik, and the time it takes before a patient notices vision correction can be longer. Regardless of what is the most accepted procedure, Gayton said he will only offer what he feels is the safest alternative. Thompson said it's "really unreasonable" to say Lasik is too dangerous. Because of the extremely high myopia and high astigmatism, she had always had reduced visual function that could not be corrected fully with glasses or contact lenses. He disputes whether it is the safest procedure. Post has sued University Physicians, The LASIK Center and its LASIK team. " To test for EBMD, the surgeon should stain the eye with a chemical called fluorescein and examine it under a lamp. Fiorelli's giant papillary conjunctivitis had improved with the giant papillae under the right lid appearing less elevated. Boydston discovered after the fact that his pupils exceed that limit. Morgan's outcome to the FDA as either a complication or adverse event, despite this being observed by the doctors, reported by the subject, and required by the FDA protocol.

Dry eyes, which sting from a lack of tears, are tolerable for most patients.

You won't find another surgery with such a high rate of success.

"Unhappy patients are extremely rare.

If a preoperative ERG was normal, we would then have objective evidence that the LASIK surgery caused it to become abnormal.

Patients with these irregularities may see so poorly after LASIK that they need corneal transplants.

Nevyas did not correct misrepresentations made in the radio advertisement.

That's why I think we're starting to see the beginnings of a problem with LASIK.

To avoid conflicts of interest, Koch recommends that patients get screened by a doctor belonging to a different medical group than the one slated to perform the surgery.

malpractice insurer for plastic surgeons.

Generally speaking, the worse your vision is prior to LASIK, the more likely it is your eyesight will regress afterward.

"No further comment can be made, since this case is currently in litigation.

A year after his surgery, with no improvement in his night vision, Post has been permanently medically grounded by the Federal Aviation Administration.

It's hard to pinpoint a precise complication rate.

Nevyas Eye Associates - Report on Standard of Care Deviation It is my opinion, to the best degree of medical probability, that Dr.

The LASIK procedure can cause subclinical ischemic damage to the optic nerve or nerve fiber layer of the retina but not enough to result in obvious optic nerve atrophy or pupil defects.

Anita Nevyas-Wallace, M.

The risk is so great, Gayton maintained, that he wouldn't have the surgery himself.

I do not feel the minimal lens opacity is sufficient to explain his loss of vision.

That makes LASIK - technically Laser-Assisted in-Situ Keratomileusis - by far the most popular elective surgery in the United States, easily surpassing breast implants, nose jobs and fat suction.

The LASIK procedure can cause subclinical ischemic damage to the optic nerve or nerve fiber layer of the retina but not enough to result in obvious optic nerve atrophy or pupil defects.

"I felt so excited about it.

However, other dissatisfied subjects may have been deliberately lost to follow up.

Morgan as a complication or adverse event, he is included in the statistical compilation of outcome data.

He cites studies and cases that show the flap can dislodge months or even more than a year after the surgery.

It became evident with medical certainty that the LASIK procedure was the principal factor responsible for Mr.

The stain will have a different color in regions of the eye with abrasions, an EBM indicator.

"After testing, I reject a quarter to a third of the patients who seek LASIK," says surgeon Douglas Koch, who chairs the ophthalmology department at Baylor College of Medicine in Houston.

I loved my job, I was set for life.

A year after his surgery, with no improvement in his night vision, Post has been permanently medically grounded by the Federal Aviation Administration.

But those cases, he said, are rare.

Accordingly, MORIA is confident that its microkeratomes will be found not infringing the Hellenkamp patents and looks forward to an early resolution of the lawsuit.

He settled on Snyder at the UA - one of the two top LASIK surgeons in Tucson, his research found.

"But that happens in such a small minority of patients.

"Unhappy patients are extremely rare.

None of these materials included the FDA required warning that the device is limited to investigational use only.

The procedure is safe, he said, when performed by doctors who know what they're doing.

Morgan's degree of ROP.

"I thought, 'My God, is this the end of my career?"

Stephen Orlin was Nevyas-Wallace's expert.

Certain complications are unavoidable in a percentage of patients.

" ROP would be a clinically significant abnormality.

Instead, Gayton is offering a newer procedure called Lasek, a variation of an older refractive surgery called PRK, or photorefractive keratectomy.

Gayton said he's abandoning Lasik at his seven offices across Middle Georgia because of problems that can happen with the cornea flap.

Excerpt: Patient personalities.

At all times hereinafter mentioned, Defendant BARRIE SOLOWAY was, and represented himself to be, a physician licensed to practice medicine in the State of New York.

Herbert Nevyas and Cheryl Fiorelli and have thoroughly reviewed these documents.

Vision is precious to all of us.

Instead, Gayton is offering a newer procedure called Lasek, a variation of an older refractive surgery called PRK, or photorefractive keratectomy.

A partial thickness buttonhole includes just the Bowman's layer; full thickness buttonholes occur when the blade exits anteriorly through the epithelium.

" That's something not to lose sight of before you go under the beam.

The eye's lens hardens with age, and adjustments in focus from near to faraway points are difficult.

In fact, Thompson said, "There's a lot of scientific evidence and well-published trials to the contrary.

If a preoperative ERG was normal, we would then have objective evidence that the LASIK surgery caused it to become abnormal.

Barrie Soloway is the Vice Chairman of the CRSQA standards committee which issues "certifications" to lasik surgeons.

"This has been a very, very positive experience for me.

Examination of IDE Supplement No.

Boydston discovered after the fact that his pupils exceed that limit.

He and Spencer Maddox perform Lasik for the Eye Center of Central Georgia in Macon.

However, other dissatisfied subjects may have been deliberately lost to follow up.

Gayton said he's abandoning Lasik at his seven offices across Middle Georgia because of problems that can happen with the cornea flap.

He and Spencer Maddox perform Lasik for the Eye Center of Central Georgia in Macon.

Nevyas has also purchased a FDA-approved Summit laser, and may be using it to manipulate results.

I loved my job, I was set for life.

Excerpt: Patient personalities.

His attorneys, Robert Beal and Michael Redhair, contend the defendants were negligent in evaluating him and failing to properly explain the risks associated with LASIK.

Fiorelli was evaluated at the Nevyas Eye Associates by Dr.

The flap is pulled back, and the surgeon uses a laser to flatten the inner layer of the cornea to whatever extent is necessary to correct the patient's vision.

The complete article is available at www.

After two years passed without any progression of Mr.

WHEREFORE, plaintiff demands judgment against the defendants in an amount which exceeds the jurisdictional limits of all other courts that would have jurisdiction on.

LASIK is an extraordinarily successful procedure.

It does not appear that this issue was ever discussed with Mr.

Field called the surgery an "amazing gift" in a testimonial on the LASIK Center's Web site.

That makes LASIK - technically Laser-Assisted in-Situ Keratomileusis - by far the most popular elective surgery in the United States, easily surpassing breast implants, nose jobs and fat suction.

Like PRK, there is more pain than with Lasik, and the time it takes before a patient notices vision correction can be longer.

His decision, however, is disputed by other ophthalmologists who say Lasik is safe.

Apparently, a registered nurse, Deborah Shelton, was in control of the foot pedals of the microkeratome that was used to create the LASIK flap.

It would also appear that the poor results obtained by Mr.

That's not quite as routine as having your teeth cleaned.

Considered cosmetic - not "medically necessary" - surgery, LASIK is rarely covered by insurance.

He explained that only the rim of the flap rejoins with the outer layer of the cornea.

Morgan's outcome to the FDA as either a complication or adverse event, despite this being observed by the doctors, reported by the subject, and required by the FDA protocol.

Morgan's outcome to the FDA as either a complication or adverse event, despite this being observed by the doctors, reported by the subject, and required by the FDA protocol.

Nevyas has conceded that Mr.

Patients with very large pupils often suffer severe problems with night vision after the surgery - what are known as "starbursts, haloes and ghosting" around lights.

It's hard to pinpoint a precise complication rate.

"This is not an ophthalmologist helping people, it's a big marketing venture.

The number of cases is increasing.

That is exactly how Steve Post, the United Airlines pilot, felt a year ago right after his LASIK was done, also by Dr.

At all times hereinafter mentioned, the defendant VISTA ALLIANCE EYECARE ASSOCIATES was and still is a foreign corporation doing business in the State of New York.

Anita Nevyas-Wallace is responsible for his problems.

"This has been a very, very positive experience for me.

"It was amazing, truly amazing for me," she said.

He explained that only the rim of the flap rejoins with the outer layer of the cornea.

Even without the FDA study criteria, he would not be considered a "good candidate for LASIK".

Salz's analyses and opinions.

Boydston discovered after the fact that his pupils exceed that limit.

Ajay Sanan, a Tucson eye surgeon who underwent yearlong specialty training in LASIK and other corneal surgeries.

Signorino for optometric referral for the planned LASIK surgery.

At all times hereinafter mentioned, the defendant VISTA ALLIANCE EYECARE ASSOCIATES was and still is a partnership doing business in the State of New York.

Moore said he has concerns about Lasek because clinical studies of the procedure are in the preliminary stages.

Everything done before was completely unregulated by protocol, and possibly much done after.

However, other dissatisfied subjects may have been deliberately lost to follow up

P.

I do not feel the minimal lens opacity is sufficient to explain his loss of vision.

"That's something not to lose sight of before you go under the beam.

"No further comment can be made, since this case is currently in litigation.

"In one of the worst cases to date, a Buffalo, N.

Her assessment was that Ms.

I served as an expert against in the earlier Cheryl Fiorelli case, and the Dr. Morgan visual axis or "line of sight" is not looking through the center of the pupil, this may be partially responsible for his visual aberrations and decreased vision.

Morgan's outcome to the FDA as either a complication or adverse event, despite his being observed by the doctors, reported by the subject, and required by the FDA protocol.

Anita Nevyas-Wallace deviated from acceptable standards of care in her surgical judgement in selecting Ms.

Even without the FDA study criteria, he would not be considered a "good candidate for LASIK".

Gayton said patients he has performed Lasik on have experienced inflammation of the cornea, infection and other complications.

Stephen Orlin was Nevyas-Wallace's expert.

Patients with very large pupils often suffer severe problems with night vision after the surgery - what are known as "starbursts, haloes and ghosting" around lights.

Cheryl Fiorelli had an ophthalmic history significant for refractive error classified as extreme myopia and high astigmatism.

Morgan's visual problem.

"It seals, it doesn't heal," Gayton said of the flap.

I have learned of these improprieties through my representation of Mr.

Patients with thin corneas can suffer vision loss.

LASIK simply reverses the problem, so the person can see distances better but not up close.

Guyton felt that, in theory, a lens problem could be part of Mr.

During that time he felt that he was being encouraged to not return.

The risk is so great, Gayton maintained, that he wouldn't have the surgery himself.

'It was just incredible.

Wallace emergently for an ocular foreign body sensation.

, who has EBMD and had LASIK.

"I would take these cases if patients were being blinded, but that's not what happens.

Please contact me for any questions.

Anita Nevyas-Wallace to evaluate her cornea.

At all times hereinafter mentioned, the defendant VISTA ALLIANCE EYECARE ASSOCIATES was and still is a partnership doing business in the State of New York.

Until about a year ago, patients who had undergone refractive surgery were not allowed to join the Air Force, said Betty Anne Mauger, a spokeswoman for the Air Force surgeon general.

I never could before.

I served as an expert against in the earlier Cheryl Fiorelli case, and the Dr.

Regardless of what is the most accepted procedure, Gayton said he will only offer what he feels is the safest alternative.

At all times hereinafter mentioned, the defendant VISTA ALLIANCE EYECARE ASSOCIATES was and still is a foreign corporation doing business in the State of New York.

This is not surprising in a patient with ROP but of course we do not have pre LASIK studies to determine if these abnormalities were increased after his LASIK.

Ambati, MD, and Alan N.

LASIK simply reverses the problem, so the person can see distances better but not up close.

' "I was a captain in the world's largest airline. Nevyas did not correct misrepresentations made in the radio advertisement. Morgan visual axis or "line of sight" is not looking through the center of the pupil, this may be partially responsible for his visual aberrations and decreased vision.

Regardless of what is the most accepted procedure, Gayton said he will only offer what he feels is the safest alternative.

This would not explain why his vision became worse immediately after the surgery in both eyes.

I had it done myself and I would do it again.

Instead, Gayton is offering a newer procedure called Lasek, a variation of an older refractive surgery called PRK, or photorefractive keratectomy.

Anita Nevyas-Wallace, M.

You won't find another surgery with such a high rate of success.

To find a qualified practitioner, try the Web site of the American Academy of Ophthalmology, www.

It does not appear that this issue was ever discussed with Mr.

Patients with thin corneas can suffer vision loss.

It's hard to pinpoint a precise complication rate.

Salz's analyses and opinions.

Thompson and Moore said the risks of Lasik are the same as those with any other medical procedure.

I also find that a disproportionately high number of them are plaintiffs after refractive surgery.

Forced to wear glasses or contacts since she was in first grade, Gold now no longer does.

The surgery itself, performed by Snyder, was not the problem.

His decision, however, is disputed by other ophthalmologists who say Lasik is safe.

That makes LASIK - technically Laser-Assisted in-Situ Keratomileusis - by far the most popular elective surgery in the United States, easily surpassing breast implants, nose jobs and fat suction.

Morgan's difficulties is also mentioned in the letter from Dr.

In a statement released Friday, University Physicians responded that "all of the UPI personnel involved in Mr.

They misrepresented the capabilities and results of Nevyas.

KAASIK AND ANDREW PHILLIPS, M.

The only source of data regarding the safety and efficacy of the Nevyas Excimer Laser is Nevyas.

However, other dissatisfied subjects may have been deliberately lost to follow up.

Glenn Kawesch Sued by Frank Soya for Medical Malpractice Visit USAEYES.

Fiorelli's giant papillary conjunctivitis had improved with the giant papillae under the right lid appearing less elevated.

Herbert Nevyas to Dr.

"It's one of the most painful things I've ever experienced," says Thomas LaMark, a freelance musician in Andover, Mass.

She removed her contact lens but continued to experience persistent foreign body sensation.

Wallace emergently for an ocular foreign body sensation.

Barrie Soloway is the Vice Chairman of the CRSQA standards committee which issues "certifications" to lasik surgeons.

It's hard to pinpoint a precise complication rate.

These advertisements were misleading.

"It was amazing, truly amazing for me," she said.

" To test for EBMD, the surgeon should stain the eye with a chemical called fluorescein and examine it under a lamp.

to Blue Cross Personal Choice in Philadelphia, Pennsylvania regarding Ms.

"It's probably the safest and most effective refractive procedure that we have," said Keith Thompson, an associate professor of ophthalmology at Emory University in Atlanta.

The test for presbyopia is a basic visual-acuity exam to measure the level of impairment.

I have reviewed the script of radio advertisements, the Nevyas web pages, and a promotional Videotape of a program that was shown on cable television and may have been distributed to patients.

Dry eyes, which sting from a lack of tears, are tolerable for most patients.

"I felt so excited about it.

But you have got to do your homework.

Boydston discovered after the fact that his pupils exceed that limit.

Post has sued University Physicians, The LASIK Center and its LASIK team.

I have reviewed the script of radio advertisements, the Nevyas web pages, and a promotional Videotape of a program that was shown on cable television and may have been distributed to patients.

Yours truly, James J.

And the more people you run through the mill, the more likely someone is going to get hurt.

Deborah Signorino in Byrn Mawr, Pennsylvania and had worn contact lenses with variable success.

Morgan's degree of ROP.

It is a phenomenon that destroys the ability to see objects clearly at night.

Anita Nevyas-Wallace deviated from acceptable standards of care in her surgical judgement in selecting Ms.

But I'd be lying to say I'm not affected by what happened," he said.

Herbert Nevyas to Dr.

I'm just not into all that hype that goes on," said Sue Gold, a Tucson operating room nurse, who had her severe myopia - nearsightedness - corrected by Sanan in March.

I loved my job, I was set for life.

Forced to wear glasses or contacts since she was in first grade, Gold now no longer does.

Nevyas did not correct misrepresentations made in the radio advertisement.

Patients with very large pupils often suffer severe problems with night vision after the surgery - what are known as "starbursts, haloes and ghosting" around lights.

Salz's analyses and opinions.

I have reviewed the script of radio advertisements, the Nevyas web pages, and a promotional Videotape of a program that was shown on cable television and may have been distributed to patients.

Nevyas-Wallace contended that refractive surgery "should indeed be covered by insurance, as it is necessary in order for her to be able to function in her work"

The risk is so great, Gayton maintained, that he wouldn't have the surgery himself.

This is another false misrepresentation.

"I would take these cases if patients were being blinded, but that's not what happens.

I do not know of any surgeon who has performed LASIK on a patient with Mr.

The injuries just aren't big enough to take to court.

It does not appear that this issue was ever discussed with Mr.

The risk is so great, Gayton maintained, that he wouldn't have the surgery himself.

Patients with these irregularities may see so poorly after LASIK that they need corneal transplants.

The Schirmer tearing test detects dry eyes by using paper filters to measure tear production.

Anita Nevyas-Wallace deviated from acceptable standards of care in her surgical judgement in selecting Ms.

Anita Nevyas-Wallace saw Ms.

A common condition known as presbyopia can present another problem after LASIK surgery: difficulty in reading.

DeJuan and the letter from Dr.

The Air Force is now offering PRK on a trial basis for some air crew and special duty personnel, but only when performed through a program at Lackland Air Force Base in Texas.

I loved my job, I was set for life.

Deglin reportedly observed peripheral retinoschisis but no breaks or retinal detachment.

There has been a lot of difficulty accepting that this really is the end of my career.

Morgan awaited the "fine tuning".

Stephen Orlin was Nevyas-Wallace's expert.

He will never fly commercial planes again.

Nevyas did not correct misrepresentations made in the radio advertisement.

This is not surprising in a patient with ROP but of course we do not have pre LASIK studies to determine if these abnormalities were increased after his LASIK.

Nevyas did not correct misrepresentation made in the TV advertisement, and Mr.

Among them is a young, highly paid Southern Arizona pilot for United Airlines whose flying career was destroyed after LASIK surgery performed in Tucson severely damaged his night vision.

He doesn't dispute that Lasik can be done safely.

This is another false misrepresentation.

One Middle Georgia patient, he said, had his flap knocked loose while playing basketball more than a year after surgery.

A disproportionately high number of them are engineers, lawyers, pilots and physicians.
