

Emacs Key Bindings

The Keyboard preference panel contains an option labelled Use Emacs Key Bindings. When this option is on, TextWrangler will accept the following Emacs-style keyboard navigation commands. The Escape key is used in lieu of the Emacs “Meta” key; to type these key equivalents, press and release the Escape key followed by the specified letter key—for example, to type “Esc-V” press and release the Escape key and then type the letter V.
